

## Smart solutions to secure homes and business establishments

**W**ith technology being largely available to the masses in the form of smartphones, mobile devices and such, the question of interconnectivity and security poses a serious threat to our online as well as real world existence, therefore making it imperative that our homes and workplaces be secured as much as our identities on the web. This interconnectivity has however proved to be an advantage when it comes to securing our lives at our homes and offices, or even while we're far away on vacation or a business trip. Skycam empowers home owners and businesses to retain complete control of their lives or establishments and secure their assets at all times.

**SKYCAM**

— reliable security. enduring service. —

## ABOUT

Skycam is an end-to-end security solutions provider dealing with surveillance cameras, burglar alarms, home automation, access control, time and attendance devices, video door phones among other security devices.

Prevention being the ideal way to avert a security breach, Skycam's cutting edge solutions aid you in threat prevention, early detection and transmission of information. The company does not compromise on quality and all their solutions utilize state-of-the-art technologies to make the customer feel safe and secure, any time of the day.

## SURVEILLANCE CAMERAS

Video surveillance at the workplace protects both the company and its employees, primarily being used to track criminals who vandalize or steal company property. When criminals notice a surveillance camera, or employees realize surveillance is in place, it discourages criminal activity of any kind. Video surveillance cameras in any case record acts of employee theft, thereby serving as a crime deterrent.

Organizations can use video surveillance to monitor employee productivity, determine the scope of job performance where an employee needs improvement and ensure the employees follow company rules and protocols. Because employees, managers and supervisors cannot be everywhere at once, a video surveillance system monitors productivity without the need for hiring additional personnel.

Skycam provides a range of analog, HDCVI and IP cameras, NVRs and DVRs with face recognition capabilities for your business needs.

# SECURE SMART. SERVICE SET APART.

## VIDEO DOOR PHONES

Door phones allow one to communicate safely with visitors without the need for direct interaction. By installing a door phone system you will not only increase the security of your home, but also improve the convenience of managing daily household chores.

VDPs with remote control enable you to observe your front door from anywhere in your house. Thanks to such a system, your children will not have to interact with strangers at the door when you are not in a position to answer the door yourself.

Skycam provides a wide range of video door phones for your family's safety.

## TIME AND ATTENDANCE DEVICES

Keeping track of employees' time and their attendance is a huge burden for employers. Are they at work? Are they on vacation? Did they clock in on time? These are important points to know, but often difficult to manage or keep track of.

Time and attendance systems play a vital role for employers by saving time and eliminating the risk of errors involved with manual tracking. A good system will allow you to collect and organize your employee's attendance data efficiently and accurately, saving a lot of their time and money in the long run.

Skycam provides a range of biometric time and attendance systems for your workplace.

## ACCESS CONTROL SYSTEMS

Access control systems can be used to limit the number of areas accessible within a building. An access control system can also take into account the day and time of entry, therefore restricting a person's access to certain hours and days of the week or month. Access control systems effectively cut costs by allowing an individual or firm to save money on printing and photocopying ID.

Skycam provides a range of biometric access control systems with smart cards for your business needs.

## SECURITY ALARMS

The mere presence of an alarm system is enough to protect the home or workplace and its occupants from a break-in. Security alarms enable the premises to be remotely armed or disarmed and controls the cameras to be monitored. Once the alarm is triggered, an alert is immediately shot to the designated smartphone so that necessary actions can be taken.

Skycam provides a range of wireless security alarms, motion, shutter & glass break sensors for your home or business needs.

## HOME AUTOMATION

Home automation systems are composed of hardware, communication and electronic interfaces that work together in order to integrate electrical devices with one another. Domestic activities can then be regulated with the touch of a button. From any remote location, users can adjust the controls on home entertainment systems, lighting units, thermostats & appliances, regulate room temperatures, monitor fire and gas levels, perform live video surveillance using security cameras / alarm systems and obtain real-time text & email alerts, etc. Homeowners can save on energy bills by reducing the duration of time lights stay on or lowering temperatures when a room is not occupied. Home automation software is often connected through computer networks so that users can adjust the settings on their personal devices.

Skycam provides a range of wired and wireless home automation solutions.

## FIRE SAFETY SOLUTIONS

Fire safety systems installed at the workplace does not just protect your staff but the entire building and under current Health and Safety laws is a mandatory requirement. Fire safety sensors like heat and smoke detectors help in detecting temperature spikes or emission of smoke and raise an alarm immediately.

Skycam provides a range of fire safety solutions for covering commercial needs.

## SKYCAM SERVICE PROMISE

Skycam is a customer centric organization. Customer delight is our motto. Skycam does not just stop at providing solutions alone. A network of after-sales professionals work around the clock to provide customers impeccable service and thorough maintenance.

**Skycam's Annual Maintenance Contract (AMC) ensures you stay secure 24x7 without any worries or hassles, by providing periodic maintenance right at your doorstep.**
